

PROFICIENCY TESTING PROGRAM

COAL

Company Background

Proficiency Testing Australia (PTA) is one of Australia's largest and most experienced proficiency testing providers. We have a reputation for providing friendly, customer-focussed service using qualified, experienced staff and specialists.

Proficiency Testing Australia is able to service a very broad range of industries, and many of our clients come to use our services based on the recommendation of colleagues. Proficiency Testing Australia has offices in Sydney and Brisbane, so our services and support are readily accessible.

Proficiency Testing Australia is accredited as a Proficiency Testing Provider by The American Association for Laboratory Accreditation. The accreditation covers the specific proficiency testing sample/artefact types listed on the agreed scope of accreditation. The accreditation meets the requirements of ISO/IEC 17043 *Conformity assessment - general requirements for proficiency testing*.

Aim of the Program

The purpose of this proficiency program is to evaluate the competency of laboratories involved with the analysis of coal to Australian Standard AS 1038; and to provide laboratories with additional external quality assurance and thus improve overall performance.

Application of program to accreditation

Participation in proficiency testing programs would satisfy requirements of ISO/IEC 17025: 2005 *General requirements for competence of testing and calibration laboratories*.

Program Details

The Coal Program is an annual program. The round is usually scheduled around July of each year.

Participating laboratories receive one or two 250 gram samples of washed coal. The types of requested analysis may include some or all of the following:

Moisture, Ash, Volatile Matter, Gross Calorific Value, Total Sulfur, Pyritic Sulfur, Sulphate Sulfur, Chlorine, Carbon (total), Hydrogen, Nitrogen, Carbonate Carbon, Phosphorus in Coal, Relative Density, Fluorine, Mercury, Selenium and Arsenic.

A robust statistical approach, using z-scores, is utilised to assess laboratories' testing performance and results are presented for each of the analyses performed by each method.

A final report, summarising the information submitted by all of the participants can be viewed on the PTA website at the conclusion of each round of the program. A summary sheet is also sent to each individual participant at the conclusion of the program. This summary sheet details the performance of that laboratory in the program.

Confidentiality

Each participating laboratory is assigned a code number to allow for confidential treatment of results in all reports and publications produced by PTA. Please refer to the PTA website (http://www.pta.asn.au/pta_Confidentiality) for more information.

Fees

Refer to the current PTA fee schedule available on the PTA website (www.pta.asn.au/pta_Schedules)
